Brainstorm & Idea Prioritization Template

Date	28/10/2023
Team ID	NM2023TMID08543
Project Name	Transparent education data management

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem statement

 Limited Access to Educational Resources: High costs of textbooks, online learning platforms, and proprietary educational materials can be barriers to education. A lack of transparency in pricing and licensing models restricts access to crucial resources.Addressing these issues requires a robust transparent data education management system that promotes openness, accountability, and accessibility in the education sector. Such a system should provide clear insights into student performance, resource allocation, college admissions, financial data, and equitable access to educational resources, while also safeguarding data privacy

Step-2: Brainstorm, Idea Listing and Grouping

Step-3: Idea Prioritization

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

Data-Driven Learning

Trans-parency in Education

Importance

If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the H key on the keyboard.

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
